

## PFA Tubing (Metric Dimensions)

Habia's tube production comprises many fluoropolymers. The following technical data shows specifications for our metrical dimensions. In addition to our standard range, we also produce according to customer demands. In our production, we continuously test tensile strength, crystallinity, diffusion and changes in length.

Bending radius, burst pressure and weight are based on mathematical calculations only. Habia cannot be held responsible for the actual outcome in working environments at the end user.
